REPOSITORIO: https://github.com/jonadras/SO1_2S2024_201513699

```
esdras@esdras: ~/Documentos
esdras@esdras:~/Documentos$ gcc -o sysinfo Procesos.c
esdras@esdras:~/Documentos$ ./sysinfo
Total RAM: 15611 MB
Free RAM: 6455 MB
Parent Process ID: 9367
Current Process ID: 10921
Child Processes of Current Process (10921):
esdras@esdras:~/Documentos$
```

The image shows a terminal window with a dark background. The title bar at the top reads "esdras@esdras: ~/Documentos". The terminal content shows the compilation of a C program named "Procesos.c" into "sysinfo" using the gcc compiler. After running the program, it displays system information: Total RAM (15611 MB), Free RAM (6455 MB), Parent Process ID (9367), Current Process ID (10921), and a list of child processes for the current process (10921). The prompt "esdras@esdras:~/Documentos\$" is visible at the bottom.
